## RE: NOTICE OF 16-DAY EXTENSION TO COMMENT PERIOD – MOFFAT COLLECTION SYSTEM PROJECT

Dear Agency or Interested Stakeholder:

Denver Water and the U.S. Army Corps of Engineers (Corps) were asked by several local agencies, individuals and stakeholder groups to consider an another extension of the public comment period for Denver Water's Draft FERC Hydropower License Amendment Application and the Corps' Draft EIS and pending Section 404 permit application for the Moffat Collection System Project. Based on the public's need to review additional documents referenced in the DEIS, the need to afford the public ample opportunity to provide substantive comments, and to facilitate a timely and efficient review process, the Corps has determined that an additional 16-day extension is warranted.

Denver Water is writing to inform you that we are extending the comment period on the Draft FERC Application. Therefore, the comment periods for both processes will be extended 16-days from March 1, 2010 to March 17, 2010.

### Denver Water – Draft FERC Hydropower License Amendment Application

All comments on the Draft FERC Hydropower License Amendment Application must be submitted in writing to Denver Water through the Denver Water website or by email, mail or fax by: **March 17, 2010**.
